MATH 230-1 Midterm Examination 2
Winter Quarter 2022
February 21, 2022

Last name: _____ Email address: _____

First name: _____ NetID: _____

Instructions

- Mark your section.

Section	Time	Instructor	
41	10:00	Bentsen	
51	11:00	Cuzzocreo	
61	12:00	Cuzzocreo	

- This examination consists of 11 pages, not including this cover page. Verify that your copy of this examination contains all 11 pages. If your examination is missing any pages, then obtain a new copy of the examination immediately.
- This examination consists of 5 questions for a total of 60 points.
- You have one hour to complete this examination.
- Do not use books, notes, calculators, computers, tablets, or phones.
- Write legibly and only inside of the boxed region on each page.
- Cross out any work that you do not wish to have scored.
- Use pages at the back for scratchwork if needed.
- Show all of your work. Unsupported answers may not earn credit.

1. (6 points) The figure below depicts a contour map for a function $f(x, y)$, with each level curve labeled with the value of f on that curve. Determine the signs of all first and second partial derivatives of f at the point P by filling in the blanks below with either “<” or “>.”

You may assume that the signs of all first and second partial derivatives of f do not change at any point in the domain of f .

(a) $f_x(P)$ ____ 0

(d) $f_{xy}(P)$ ____ 0

(b) $f_y(P)$ ____ 0

(e) $f_{yx}(P)$ ____ 0

(c) $f_{xx}(P)$ ____ 0

(f) $f_{yy}(P)$ ____ 0

2. Let \mathcal{C} be the curve parametrized for $t \geq 0$ by

$$\mathbf{r}(t) = \langle \sin t - t \cos t, \cos t + t \sin t \rangle; \quad t \geq 0$$

(a) (6 points) Find the arc length of \mathcal{C} between the points $(0, 1)$ and $(\pi, -1)$.

(b) (4 points) Find an arc length parametrization of \mathcal{C} beginning at the point $\mathbf{r}(0)$.

3. Consider the function

$$f(x, y) = \frac{2x + 4y}{x^2 + y^2 + 1}$$

(a) (2 points) Find the domain of f .

(b) (4 points) Compute $f_x(1, 1)$ and $f_y(1, 1)$.

(c) Write and simplify the equation defining the level curve $f(x, y) = c$ for the following values of c .

i. (2 points) $c = -1$

ii. (2 points) $c = 0$

iii. (2 points) $c = 1$

iv. (2 points) $c = 2$

(d) (4 points) Sketch the level curves from part (b) on the axes below.

4. Compute the following limits, or show that they do not exist.

(a) (6 points)

$$\lim_{(x,y) \rightarrow (1,0)} \frac{\cos(xy) - 1}{\sqrt{\cos(xy)} - 1}$$

(b) (6 points)

$$\lim_{(x,y) \rightarrow (0,0)} \frac{x^4 y^2}{x^2 + y^2}$$

(c) (6 points)

$$\lim_{(x,y) \rightarrow (0,0)} \frac{x^4 + y^2}{2x^4 + y^2}$$

5. (8 points) A tennis ball is launched inside of a wind tunnel. It is launched from the point $(0, 0, 0)$ with an initial speed of 50 m/s in the direction of the vector $\langle 0, 4, 3 \rangle$ and its trajectory is affected by gravity and the wind such that its acceleration in m/s^2 is given by

$$\mathbf{a}(t) = \langle -3, -1, -10 \rangle.$$

Determine the distance in meters between the launch point of the ball and the point at which it lands. (Give an exact numerical answer, but you do not need to simplify).

THERE IS NO EXAMINATION MATERIAL ON THIS PAGE.

YOU MUST SUBMIT THIS PAGE.

If you would like work on this page scored, then clearly indicate to which question the work belongs and indicate on the page containing the original question that there is work on this page to score.
